Source-linked geometry-inconsistent continuation examples

× expected branch ▲ native proposal ○ Gaussian center

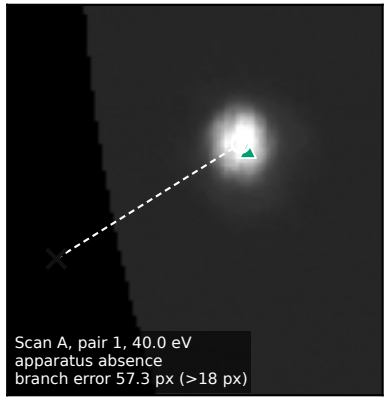

a **LocoTrack**

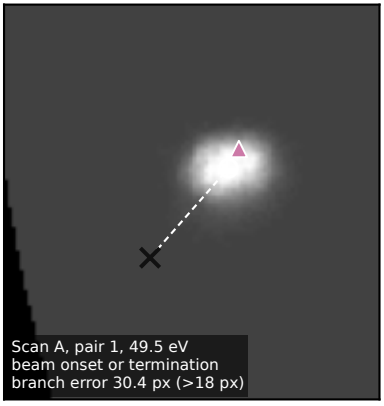

b **OSTrack**

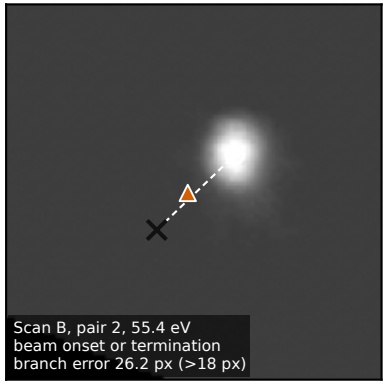

c **DAM4SAM**

d **Lucas-Kanade**

e **EasyLEED**

f **Selection and interpretation**

First qualifying source row per method in frozen case/frame/branch order. No selection by error magnitude.

Full outcome counts (not ranks):
LocoTrack: 36/272 accepted fits
OSTrack: 34/269 accepted fits
DAM4SAM: 36/272 accepted fits
Lucas-Kanade: 14/206 accepted fits
EasyLEED: 4/222 accepted fits

Possible false continuity; not proven identity switches and not tracker ranking.

Every crop is hash-linked to its frozen source row and raw image; examples do not supply identity ground truth.
